“We recently replaced a washer and two dryers in our wash aisle with a Braun remanufactured 400 Open Pocket Washer/Extractor and two each Braun 123H dryers. Over the course of one weekend, Braun removed our existing equipment, installed the new machines and had them running and fully operational! The smooth and quick turnaround was essential to our being able to service our customers without any negative impact!

A Braun service technician did a full assessment of our wash aisle and helped us to find additional utility savings. The equipment is running great, water usage is down, and we had significant reductions in dry times for terry products, and up to 60% on mat processing.

We’d like to thank everyone at Braun for working with us to make this a successful project!”
